Introduction

"Hello. How are you? I am _____ working with Domrei Research and Consulting. Do you have time to talk to me for about one hour? I would like to ask you some questions for a research project we are conducting on health, health care spending and health care utilization. We would like to investigate how families deal with illness.

You do not need to talk to me if you do not want to. And if there is any question you do not want to answer, that will be fine. If you do want to talk with me, I will keep everything that you tell me entirely private and confidential, and will not talk to other people about what you have said. I will also keep you and your family's names confidential, and I will not tell anyone that you have talked to me. Your answers will in no way affect the assistance that any organization or government agency will provide to your community or your family. If you have any problems, or if you feel uncomfortable answering any question, you should feel free to stop talking with me at any time.

If you have any questions about this research or the survey, you can contact the Domrei administrator Khim Sarun on 023 222 501.

We would appreciate your assistance in filling out the questionnaire, but participation is voluntary and there is no need to answer any question. You can refuse to answer any question that you don't want to answer or you can stop to discuss the questions at any time. I want to thank you and say I hope this interview will only take 30 minutes. I want to remind you that all your answers are very important. This is not a test. There are no right or wrong answers. Therefore, I want to ask you to answer correctly and tell the truth.

I will ask you detailed questions about you and your family members and children right now and then return in 1 year and again after 2 years and ask you similar questions. May we have your permission to ask these questions, and would you be willing to participate?"

Do you have any questions for me?

Can I start asking my questions now?
