

Technical Status Report: Research Grants

Instructions on back

Part I: Project Identification

Institution	Insert institution name
Address	Insert address
	Insert city, state & zip code
Principal Investigator(s)	Insert principal investigator(s) name(s)
Project Title	Insert project title
Award Amount	\$0.00
NCBC Agreement Number	Insert NCBC agreement number
Award Period	FROM 01/01/00 TO 01/01/00
Report Period	FROM 01/01/00 TO 01/01/00
Other Funding Sources	Insert other funding sources
and Amount	\$0.00

Part II: Project Summary

Insert project summary

Part III: Technical Information

See Instructions for details

Instructions for Technical Status Report Form: Research Grants

All final Project Status Reports are due within 90 days after the termination date of the grant. All other required Project Status Reports are due within 45 days of the reporting period as specified in the Grant Agreement.

Submit the reports to:

Contracts and Grants

Attn: Joan Pifer
North Carolina Biotechnology Center
PO Box 13547
Research Triangle Park, NC 27709-3547

Part I: Project Identification

The identifying data in Part I should be the same as those contained in the Grant Agreement. The source and amount of funding, other than Biotechnology Center funds, used to support the project should be reported in this section. If there are no other funds, please state "none" in the appropriate space.

Part II: Project Summary

The Project Summary (no more than 200 words) must be self-contained and intelligible to the lay reader. It should not be the same as the Technical Description provided in Part IIIA; this summary should be written as concisely and informatively as possible. It should describe: 1) primary objectives and scope of the project, 2) techniques or approaches used, 3) findings, and 4) implications for further research and/or practical applications for other industry, state, local governments, and educational or research institutions.

Investigators should be aware that this summary might be used by the Biotechnology Center to answer inquiries by nonscientists about the nature and significance of the research, and to publicize its awards through press releases and newsletters. These communications typically include the Project Title and information provided in this summary. You may wish to have the Project Summary reviewed by appropriate counsel in order to protect your proprietary rights to technologies for which a patent may be, or is being, sought.

Scientific jargon and abbreviations should be avoided. If necessary, an additional sheet may be attached.

Part III: Technical Information

The items listed in Part III on the front of this form should be submitted with this report, where applicable and to the extent possible.

A. Technical Description: 1) provide a technical description of the activities and results, 2) describe the original goals and expectations supported by this grant, and 3) if applicable, state how those goals and expectations have been revised or refined during the course of this project.

B. Additional Research and Funding Support: Attach a brief statement concerning future plans and any intent to apply for additional support to continue the research resulting from this funding. Include project title, source, amount, duration, and status of award as applicable.

C. Abstracts of Theses: Self-explanatory.

D. Publication Citations: For publications (in press or submitted) include the title, journal or other reference, date submitted, and authors. For abstracts, include the organization or meeting addressed, place, date, and authors. Provide a copy of publications, abstracts, or manuscripts.

E. Collaborators: Provide a list of co-investigators, research assistants, and others associated with the project. Include title or status, e.g. associate professor, graduate student or postdoctoral.

F. Inventions: Briefly describe any inventions, patents, or patent applications that resulted from the project.

G. Other: Include any other material or information that is either specifically required in the grant agreement (e.g. special technical reports or products such as films, books, studies, conference proceedings, etc.) or that you consider would be useful to the Biotechnology Center.

Part IV: Signatures

The report must be signed by the principal investigator(s) and an authorized institution official.
